Re: Docket #07-16

Dear Secretary Dortch,

Using the internet is a daily routine for many Americans who use it for work, education or play. It's hard to imagine a day without using the internet or e-mail. Because it is so much a part of how our country operates, it is important that everyone have access to the internet and its benefits.

I'm glad to hear that M2Z Networks is proposing a plan to provide free, fast broadband to anyone with a modem. By having more homes and businesses on-line, more Americans can fully connect with the world around. Also, more schools and public places would save money while providing fast internet access.

I hope you'll approve the proposal to allow for more broadband internet availability across this country. We all need to be as connected and competitive as possible, and not fall behind what other countries are already doing.

Sincerely,

Jeffery L. Tansill

Washington, DC 20554

Dear Madame Secretary,

Many Americans are left without access to broadband internet service due to their location or economic circumstances, but there is an opportunity to change this. By approving of Docket #07-16, the FCC would allow access to be extended to more Americans and without a fee.

I approve of the proposal by M2Z Networks, allowing them to receive the spectrum needed for this service. The outcome would benefit people from all walks of life and communities across the country. With just a modem, students, parents, seniors and businesses would be able to access the internet for e-mail and web, connecting them to sources of news and information.

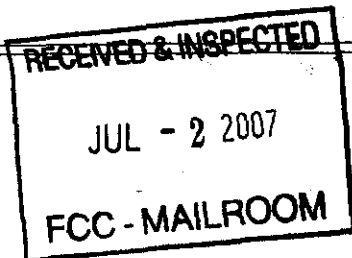

I ask the FCC to support the plan to provide free, fast broadband access to all Americans. In doing so, this country will be able to bridge the digital divide and stay competitive with other countries technologically.

Sincerely,

Delegate Jonathan Miller

Re: Docket # 07-16

Dear Secretary Dortch,

I write to you today regarding Docket # 07-16 to provide fast, free, family-friendly wireless broadband access to all Americans. If the FCC approves this proposal, all communities will benefit from being more connected and our economy will undoubtedly grow. Many communities currently see limited internet access or access that is too expensive. If provided with fast, free, family-friendly wireless broadband internet access, community members, schools, businesses and individual households would see expanded opportunities.

I think schools would benefit greatly from having broadband available to teachers, as well to more students and parents. There is so much available on-line such as teaching tools and educational resources. Children in rural areas would have access to the same resources as students in the city, and parents would have the ability to work with their children at home. Almost 80% of college students use the internet in their studies, and this access would prepare students for internet and computer use before they get to college.

Citizens need more access, not less and this proposal will provide just that. I hope you will consider the many benefits of Docket # 07-16 and provide our citizens with the opportunity to receive fast, free, family-friendly wireless broadband internet access.

Sincerely,

Delegate Walter E. Duke

Dear Secretary Dortch:

For many in this country, broadband internet is just not a viable option. For some, the reason is location, they in an area where service has not expanded. Others simply cannot afford the extra cost for broadband. If Docket #07-16 is approved, this option will be available to millions of Americans.

M2Z Networks has a plan to provide free, fast broadband internet to everyone, and I believe the plan should be able to go forward. With a modem, anyone would be able to go on-line at a faster speed and use the internet to work or play. Currently, over 40% of students in households that make less than \$20,000 use the internet. This plan would give those children a better opportunity to experience the benefits of the internet.

By giving more Americans the chance to use fast internet for free, this plan helps our schools and businesses. Broadband internet would be able to expand to new areas and be used in more homes. Please support the M2Z Networks proposal.

Dear Secretary Dortch,

I'm writing to show support for the Docket # 07-16 proposal to provide free, fast broadband access to all Americans, especially because of the benefits it will bring to businesses. Without broadband access, many businesses are unable to have the best marketing capabilities and connectivity with their industry. When businesses are run more efficiently, we all benefit.

In many areas, broadband is not available at all, or not a financially viable option. Currently, just 35% of small businesses have websites. The economy depends on successful small businesses, and many could improve by becoming participants in the on-line market. With 99% of business in American being done by small businesses, the economy and local communities can benefit from more successful small and independent businesses.

Please approve the proposal by M2Z Networks to provide fast, free broadband internet access. Our economy depends on businesses keeping up with the best technology available.

Regards,

CC: FCC Chairman Kevin Martin

Re: Docket #07-16

Dear Secretary Dortch,

I'm writing to you asking for support of the M22 Networks proposal to provide free, fast and family-friendly broadband and internet access to all Americans. Making broadband available in more homes, and making it affordable, is a positive move for everyone, and I support this.

To many students, families and teachers, working on-line at home is vital to their education and preparation for school. Yet only 42 percent of America's homes have broadband internet. With high-speed access, using the tools and resources available on-line would be easier and they could experience more of the internet's benefits.

Broadband access is important for the education of our children, and the teachers who need as many resources as possible to help them. I ask you to support this proposal and bring affordable broadband to homes across this country.

Regards,

Ruth Rowan
